

Scienta Omicron – TEAMLEITER/IN TECHNISCHER EINKAUF (W/M/D)

WHAT DRIVES YOU?

After several years of successful professional experience in operational procurement, you are aware of your potential – and know that you can achieve even more. You have long since started thinking beyond day-to-day operations, make well-informed

decisions and take responsibility

for people and results. What are you missing now? The scope to truly shape the future.

At Scienta Omicron, the next logical step in your career awaits you: greater freedom to make decisions, genuine leadership responsibility and the opportunity to strategically develop the procurement function. Bring your experience, your drive to make a difference and your fresh ideas to a place where they are not only needed, but where they will make a real impact.

YOUR ROLE IN A NUTSHELL

Operational Procurement

- Order management/maintaining order bills of materials
- Quotations: obtaining, negotiating, raising complaints
- Monitoring delivery dates
- Work preparation

Strategic Procurement

- Developing and implementing product group and procurement strategies
- Analysing and evaluating international procurement markets
- Identifying and qualifying new suppliers
- Contract negotiations
- Establishing and maintaining supplier partnerships
- Cost and quality optimisation and value analyses

Purchasing Team Leadership

- Leading and developing a small team
- Managing and optimising procurement processes
- Defining and monitoring procurement key performance indicators
- Taking responsibility for cost, quality and delivery targets
